Skills

Languages: Java, C/C++, JavaScript (ES5 & ES6), HTML & CSS, Python, C#

Frameworks: Node.js, JQuery, Bootstrap, Underscore.js, Backbone.js, RequireJS, Swagger, doT.js, JUnit, QUnit, Chai, Intern, Spring, Pyramid

Software & OS: YourKit profiler, Maven, Jenkins, RTC, GitHub, ElasticSearch, KVM Hypervisor, IBM BlueMix, Amazon EC2, Windows and Linux environments, some iOS and Android experience

Databases: SQL, MongoDB, MySQL

Other relevant skills: Data analytics, big data solutions, object oriented design, agile and scrum, unit and functional testing, designing scalable solutions, human-computer interaction

Soft Skills:

- Thrive working in both team and individual environments leading to the successful delivery of products and projects.
- Experience in giving formal and impromptu demos and presentations to both software development teams and company executives.
- Excellent oral and written communication skills; I have written an article for the University of Manitoba newspaper, The Manitoban, which can be read here:
<http://www.themanitoban.com/2011/11/sell-yourself-professionally-digitally/2716/>

Work Experience

- **IBM - Watson Analytics Smarts, RAVE, Cognos Analytics Modelling UI** Ottawa, ON
Staff Software Developer (Full-stack) *July 2014 - Present*
 - Selected to help the Cognos Modelling UI team with adoption of a new tech stack: ReactJS, mobx, SCSS, ES6, webpack and Jest. Promoted to Staff Software Developer in November 2016.
 - Performance testing using YourKit and improvement in both JavaScript and Java implementations of RAVE; performance of map bundle improved 2x and matched D3 performance in JavaScript.
 - Developed a learning/recommendation system using Java and ElasticSearch that automatically preforms actions for the user based on prior preferences and use patterns.
 - Lead developer on Watson Analytics SSO server that uses the OAuth2 protocol to connect to IBM Dataworks data preparation tool.
- **IBM - Extreme Blue** Markham, ON
Technical Intern (Work Term 3) *May 2013 - September 2013*
 - Project Title: Exploiting Direct-Attached Flash to Improve Price Performance of High-Density Cloud Servers - worked with Linux kernel and KVM Hypervisor to try and improve swap speed via parallel processing to leverage flash storage as a low-cost alternative to memory on a server.
 - Built the prototype solution, developed a business case for said prototype and presented our project and business strategy to IBM executives, including CEO Ginny Rometty.
- **Electronic Arts - Global Online Services - Tools Team** Burnaby, BC
Associate Software Engineer (Work Term 2) *September 2012 - December 2012*
 - Built a server configuration tool allowing for quick editing of server config files on intranet portal site using Java and the Spring framework.

- **Thinkbox Software** Winnipeg, MB
2D/3D Software Developer (Work Term 1) *January 2012 - April 2012*
 - Added support for multi-channel exr files, as well as Z-depth and normal buffers into Krakatoa SR.
 - Debugged and fixed the frame-buffer used in render previews of Krakatoa.
 - Rewrote Draft compositing libraries to improve performance and added ability to add or remove audio from a series of composited frames using C++ and Python.
- **University of Manitoba - Human-Computer Interaction Lab** Winnipeg, MB
Research Assistant *May 2011 - December 2011*
 - Assisted with adaptableGIMP project by prototyping the interface and developing the algorithms for the recommender system using Vala.

Projects

- **Craft Breweries of Ottawa/Gatineau**
<https://rdraward.github.io/ottawa-craft-beer-map/>
 - Used the Google Maps API to plot out the craft breweries in the Ottawa/Gatineau region.
 - Display breweries with logos as markers, display contact info, hours of operation and my personal recommendation.
- **Manage My Restaurant iOS and Web App**
<https://github.com/umdrawa2/4350Proj>
 - Successful final year Computer Science project.
 - Work as a team to design and develop a web application, with a surprise addition of an iOS app added a few weeks before the project deadline.
 - Unit and functional tests are included. Project was hosted using Amazon's EC2.
 - Decided to use Python Pyramid framework for server, Bootstrap for the web front-end. Gained some experience in iOS and Objective-C programming, along with Selenium testing.

Volunteering and Extracurriculars

- **IBM - nextWave** Ottawa, ON
Co-Chair *June 2015 - December 2016*
 - Helped to run the group for new hires to create a sense of community within the lab.
 - Organize and run fun events for the entire IBM Ottawa lab, including screening of Star Wars: The Force Awakens, bringing in food trucks and throwing an end of year holiday social.
- **IBM - Technical Vitality Team - TechChallenge** Ottawa, ON
Co-Chair *September 2015 - July 2016*
 - Organize and run hackathons and tech challenges for the IBM Ottawa lab.
 - Recent challenges included using Watson APIs and the Weather Company API on Bluemix.
 - Community hackathons used to develop prototypes for local charity and non-profit organizations.

Education

- **University of Manitoba** Winnipeg, MB
Bachelor of Computer Science (Honors) *2009 - 2014*
 - Minor in Management from the Asper School of Business
 - Dean's Honor List
